

New experiences and lessons

Our travels teach us as much as our classrooms do — taking a cue from this ethos, 23 students of Sri Sri Academy take off to Malaysia to learn from a new culture and lessons. They return after a week, more enriched. **Young Metro** reports...

Students of Sri Sri Academy and their teachers have fun during their trip to Malaysia

Students take a group picture after their tour of University of Malaya

Students of Sri Sri Academy learn from the museums and planetarium in Kuala Lumpur

Students take a tour of Sunway University and interact with its students

Engaging with ministers in Malaysia was enlightening. It offered us valuable insights into the youth parliament. The discussions added a fascinating layer to our understanding, reviving the concept of "learning made fun"

Purvi Surana
Class XI

Malaysia wasn't on my bucket list, but the school trip turned into an unforgettable experience. Meeting government officials, touring prestigious institutions and soaking in their vibrant culture was captivating and an unique adventure

Vidushi Kedia
Class IX

Our Malaysia trip was a phenomenal adventure, seamlessly covering numerous places and meetings in just a week. The warm hospitality at SBPI Gombak School, with invaluable assistance from our coordinators, will always be cherished in my memories

Palaksi Goel
Class IX

This was a carefully curated excursion, aimed to extend the boundaries of classroom learning by integrating real-world experiences with academic curriculum. The selection of destinations for this trip, ranging from historical landmarks to natural wonders, was intentional, crafted to ignite curiosity and deepen the students' understanding of global cultures and environments

Gargi Banerjee
principal

Twenty-three students and two faculty coordinators of Sri Sri Academy had an enriching educational experience during a trip to Malaysia. The students took off for a week on January 6, to learn from the culture and heritage of a new nation and to interact with its student community and leaders.

The first destination was Putrajaya, the nation's administrative capital and the seat of the famous Putra Mosque. The students attended an official welcome session in the evening that was hosted by the ministry of economy.

The first learning experience happened at Planetarium Negara in Kuala Lumpur, where the students got to study detailed models of the solar system and periodic tables. They also watched a 3D film, We Are Astronomers.

At the Bank Negara Museum the young learners got to see a huge range of global currencies.

The evenings were about having fun at Times Square.

Other sites visited were the National Science Centre in Kuala Lumpur where the students enjoyed gaming and exploring some practical applications of scientific concepts.

The students also had an interaction with a political leader getting an insight into Malaysia's political landscape. They discussed educational, economic and industrial policies with him. They also took part in discussions on Sustainable Development Goals at Sunway University and the University of Malaya as well as checked out higher education options there.

The students did a lot of shopping at Chinatown. From local music to food, they sampled a lot of exotic fare. The students also appreciated the iconic KLCC Twin Towers and visited the Batu Caves and the Indoor Theme Park.

A visit to the Royal Selangor factory taught them the pewter-making process. The students ended their enriching journey with a visit to Beryl's Chocolate Factory where they sampled a delightful assortment of chocolates.
